LETTER OF RECOMMENDATION

With immense pleasure, I write this letter of recommendation for **Mr.Nikhil Thammishetty** to support his candidature for admission into the Master's program at your university. I had the opportunity to interact with him and observe him over the past 4 years as I am the Head of the Department of Computer Science and Engineering Department. I have also taught him **Computer Networks** in his fifth semester.

He actively participated in classroom discussions and showed a keen interest in learning the various intricacies of technological advancements. I found him to be a very attentive, motivated, enthusiastic student who always maintains a cheerful demeanor. He always maintains a good academic record and shows an eagerness in solving the assignments provided. He astonishes me by understanding the fundamental ideas and outstanding clarity of thought. His innate passion for excelling at any assignment attempted has brought about good standing in his group for many semesters.

Apart from scoring well in academics, Nikhil has also been elected as secretary of the KITS Cyber Association and conducted many workshops which involved industry leaders to train the students. He was also been an active participant in organizing the college technological and cultural fests, Nikhil is a person who put forward the most intriguing ideas for various events. He is also cherished by his juniors for guiding them in various competitions and interacting with them from time to time.

I feel that he will be an ideal fit for your program with his true and preserving nature. I fully support his application for a Master's in his desired specialization at your university.

Capt. Dr. RAVINDRA BABU KALLAM
